### Advisor Management

With advisor management, businesses can streamline their lead generation, allocation, and conversion processes by assigning leads to the right advisors based on various factors like location, expertise, availability,

### Advisor Dashboard

The advisor dashboard is a user-friendly dashboard that enables advisors to track their progress. The dashboard shows relevant information such as the number of new leads received, hot prospects, leads at risk, and the overall health of their pipeline

### Advertisement forms

Advertisement forms are a type of lead generation form used to attract potential customers through various marketing channels. These forms are designed to capture contact information and customer preferences from interested parties, allowing businesses to follow up with targeted marketing or sales campaigns.

### Enquiry Forms

enquiry forms are utilized to capture information about prospects or leads who have shown interest in the products or services offered by the business. enquiry form include basic information like name, email address, phone number, and location.

### Activity Tracking

Activity Tracking is one of the core features of Lead Management System, which allows you to track all activities related to your leads

### Telegram Notifications

All pending follow up will be send to advisors telegram on daily basis advisor can call from there and track the status without using the application
