Why Choose Accurate Flex Data

- > Customizable Form Fields
- > Automatic Data Validation
- > Multiple Forms
- > Inbuilt Payment Gateway

Customizable Form Fields

Choose the fields you want to capture for each form and add new custom fields as needed.

Automatic Data Validation

Set up field validation rules to alert users about any errors before saving data.

Multiple Forms

Multiple forms in Flex Data Forms can be created easily to collect different types of information. With the help of this software, users can create different forms according to their requirements and gather necessary data from customers

Inbuilt Payment Gateway

Our payment gateway integration solution for forms makes it easy for you to receive payments alongside collecting data from your forms, allowing you to streamline your workflow and improve profitability.
